
(a) exact, cell-averaged
(b) full mixing, DIS
(c) face routing, DIS
(d) full mixing, DISV
problem A, flow along the rows: y (km)
(e) exact, cell-averaged
(f) full mixing, DIS
(g) face routing, DIS
(h) full mixing, DISV
problem A, flow at 30° to the rows: y (km)
(i) PRT, 12.5 m cells
(j) full mixing, DIS
(k) face routing, DIS
(l) full mixing, DISV
problem B: y (km)
x (km)
F, fraction of the water in the cell that reaches the well
(m) new water in the well, 12.5 m cells
share of new water in the well's water
time since tagging started (1,000 d)
(n) difference to PRT
difference to PRT
1 step per flow step (2,000 d)
4 sub-steps of 500 d
16 sub-steps of 125 d
64 sub-steps of 31 d
PRT particles
time since tagging started (1,000 d)
